...with The British Library.

Over the years, economists, among others, have examined various markets. However, **securities** markets have attracted a large part of this academic interest. The attention given to **securities** markets can be divided into three parts. The first focuses on the impact of these markets on economic development. The **second deals** with the "efficiency" of **securities** markets. The "widely" accepted view in this part revolves around the Efficient Market Hypothesis. This states that **securities** markets "fully reflect" all available information. The third part examines the institutional microstructure of **securities** markets.
